MET INSTITUTE OF COMPUTER SCIENCE

Program Number	01
Roll Number	1551
Title of program	Submit a PDF document indicating the following UI Tools with 5 feature and 2 sites
Objective	<p>Submit a PDF document indicating the following UI Tools with 5 feature and 2 sites that use them</p> <p>WebFlow JustInMind Origami Adobe XD Sketch</p>

Theory: -

UI Tools - Features and Sites

1. WebFlow

Features:

- Drag-and-drop design interface for building responsive websites.
- No coding required, but also allows for custom code integration.
- Real-time preview of the website during design.
- Integrated CMS for dynamic content management.
- Hosting with built-in performance optimization.

Sites using WebFlow:

- Lattice (HR platform)
 - HelloSign (eSignature solution)
-

2. JustInMind

Features:

- High-fidelity prototypes with rich interactivity.
- Allows for user testing and collaboration on prototypes.
- Supports mobile, web, and desktop platforms.
- Pre-built UI components and templates.
- Integrates with tools like Sketch and Photoshop for design import.

Sites using JustInMind:

- Aviva (Insurance company)
 - Samsung (Tech company)
-

3. Origami

Features:

- Powerful interaction design tools with a focus on dynamic interfaces.
- Real-time collaboration for teams working on prototypes.
- Integration with other tools like Sketch for design import.
- Flexible layout options for custom interactions.
- Allows creating complex animations and transitions.

Sites using Origami:

- Facebook (Social media platform)
- Instagram (Photo and video sharing app)

4. Adobe XD

Features:

- **Vector-based design tool for creating user interfaces.**
- **Integration with Adobe Creative Cloud for easy asset management.**
- **Prototyping with interactive elements and transitions.**
- **Collaboration tools for real-time feedback from team members.**
- **Cross-platform design with support for Windows and macOS.**

Sites using Adobe XD:

- **Microsoft (Software and technology company)**
 - **T-Mobile (Telecommunications company)**
-

5. Sketch

Features:

- **Vector-based design tool ideal for UI/UX design.**
- **Easy to create reusable components and symbols.**
- **Integration with plugins and third-party tools for extended functionality.**
- **Supports collaborative design with shared libraries and documents.**
- **Export designs in various formats for developers.**

Sites using Sketch:

- **Airbnb (Online marketplace for lodging)**
- **Slack (Messaging app for teams)**
